Jonathan Bouaziz
iOS Developer – UX Genius – Google Glass Explorer

iOS Engineer, UX Guru, Creator of code. I tell computers what to do in excruciating detail in order to create complexly simple user interfaces.

Paris, France
(*Willing to relocate*)

Experience

Co-Founder, Lead iOS – User Experience (UX) Developer
My16 Lab, LLC – Los Angeles, CA, USA – October 2013, Present

- Serves as a technology consultant on the My16 iOS application.
- Implements development environments using an Apple Enterprise Account.
- Works closely with other engineering team members and the UX team to design and architect My16.

Lead iOS – User Experience (UX) Developer
Spokeable - Miami, FL, USA - December 2012, Present

- Built the foundation of the Spokeable user experience.
- Implemented development environments using an Apple Enterprise Account.
- Collaborated with the business team on feature conception, development and execution: translated feature ideas into tangible products.
- Treated the application design as Monet and Picasso do with oil and canvas.

Front-End – User Experience (UX) Developer
OpenMyNet LLC - Beijing, China - May 2012, July 2012

- Designed software layout for the OpenMyNet key product.
- Developed wireframes that maximized User Interface (UI) and User Experience (UX).
- Coded front-end software that made key functionalities easy to use

Front-End – PHP Developer
TheCreator.ME - Beijing, China - May 2011, October 2011

- Created a back-end website to manage online products and website statistics.
- Enhanced the website by adding new functionalities such as search engine, user portfolio.

New Medias Manager – .NET Developer
CoPeerRight Agency - Paris, France - July 2007, September 2010

- Developed applications for company intern usage purposes, including Instant Messaging software using a .NET Web Service.
- Created a Silverlight Extranet for clients to manage their account.
- JavaScript development using GreaseMonkey.

- Master 2 in Montreal, Canada

About me

International Experience
For the past couple years, I've traveled a lot and worked in international environments. Being fluent in both French and English allows me to work with clients from all over the world.

Loisirs
I love cooking, driving and watching a good movie. Not only is creating apps is a way to further develop my skills as an iOS developer, but it is also to express my creativity as a curious techie. My curiosity of UX and iOS development is what has led me to develop beautiful apps with great people. It is my passion.

If you want to hear why I'm not just an other developer, contact me.
